SUBJECT INDEX

Adolescents,
healthy eating/physical activity patterns promotion 93
Agriculture,
occupational health, education, Latin America/Caribbean 53
AIDS,
perceived disease risk, links with television viewing 175
prevention, adolescents 287
Alcohol,
perceived disease risk, links with television viewing 175

Anabolic steroids,
usage, weight-training athletes 157
Asbestos,
perceived disease risk, links with television viewing 175
Athletes,
weight-training, anabolic steroids usage 157
Cancer,
communications, analysis of criteria 151
Data analysis,
evaluation of health education 215
standardization of procedures and terminology, evaluation of health education 215
Drink-driving,
prevention, evaluation of assumptions 145
Drug education,
concurrent televised and school based programs 373
fifteen years exploration of different programmes 433
past disappointments and future challenges 417
programmes in Singapore 347
'life-skills' approach 319
Drug use,
among nursing students 329
among working adults 353
health education intervention programme in India 337
running scared from the real issues 423
Fitness,
health, relationships, implications 81
Food and fibre,
in a Scottish community 223
Health,
fitness, relationships, implications 81
Health Action Model,
role in preventing drug abuse 305
Health education,
effects of, worksite 33
Health promotion,
general evaluation, worksite 69
mass media, evaluation 123
primary care, hinderance by 'working class fatalism', women 105
Health promotion programmes,
behavioural/financial models, evaluation, worksite 61
occurrence, worksite 15
Health risk appraisal,
feedback, effects of, health-related behaviour, worksite 161
Health-protective attitudes,
behaviors, structure, consistency 195
Health-related behaviour,
effects of health risk appraisal feedback, worksite 161
Healthy eating,
promotion, adolescents 93
Job stress,
men/women, FRG 45
Mass media,
health promotion, evaluation 123
Men,
job stress, FRG 45
National Health Service,
food and health policy 275
Physical activity campaign,
community-based, evaluation 115
Physical activity patterns,
promotion, adolescents 93
Reasoned Action Theory,
applications to illicit drug use 361
Resistance skills,
multitrait-multimethod role play 401
School health instruction,
assumptions, preliminary study 131
Scottish dental health education programmes
secondary school children, assessement of two dental health education programmes 231
Smokeless tobacco,
parental influence on intentions to use 409
Smoking,
modification, effects of competition/relapse prevention training, worksite 5
prevention program using schools and television 385
Smoking cessation,
patterns in seven Western countries 267
worksite intervention 257
worksite intervention 185
Smoking education,
training of nurses, teachers 245
Tobacco advertising,
breaches of voluntary agreement 207
effects on children 207
Weight loss,
campaign, implementation/cost-effectiveness, worksite 27
Women,
job stress, FRG 45
primary care health promotion, hinderance by 'working class fatalism' 105
Women's health shop,
health education, health promotion 239
Worksite,
effects of health education 33
health promotion programmes, occurrence 15
health promotion programmes, behavioural/financial models, evaluation 61
health promotion, general evaluation 69
health-related behaviour, effects of health risk appraisal feedback 161
smoking worksite, effects of competition/relapse prevention training 5
weight loss campaign, implementation/cost-effectiveness 27
Worksite smoking cessation intervention,
12-month follow-up 185
participation and outcome 257
